- Method for preventing diabetic complications employing a cholesterol lowering drug alone or in combination with an ace inhibitor.
- A method is provided for preventing diabetes and preventing complications resulting from diabetes by administering to a diabetic patient a cholesterol lowering drug, such as pravastatin, alone or in combination with an ACE inhibitor, such as captopril, zofenopril, ceronapril, fosinopril, enalapril or lisinopril.

LACK OF UNITY OF INVENTION

European Patent

Office

The Search Division considers that the present European patient application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions.

The problem the application tries to solve is to prevent diabetes or to prevent or reduce the risk of complications resulting from diabetes.

The proposed solution is to use cholesterol lowering drugs.

Documents nos. 1 and 2 cited in the Search Report describe the use of cholesterol lowering drugs for the wanted effect.

Therefor the general idea of using cholesterol lowering drug for preventing diabetes or diabetic complications is not new and in view of the state of the art the problem has to be redefined as finding further lipid lowering drugs for preventing diabetes or preventing or reducing the risk of complications resulting from diabetes.

The proposed compounds are structurally and concerning their mode of action not so related as to form a single inventive concept.

There is NON-UNITY A POSTERIORI

1. Claims 1,12-15,17,19,21,23,26,29 (partially) 2-4,6-8,11,16,18,20,22,24,25,27,28,30,31 (completely)

combination with an ACE inhibitor for manufacturing a medicament for preventing diabetes or preventing or reducing the risk of complications resulting from diabetes

2. Claims 1,12-15,17,19,21,23,26,29 (partially)
5 (completely)

Use of a squalene synthetase inhibitor alone or in combination with an ACE inhibitor for manufacturing a medicament for preventing diabetes or preventing or reducing the risk of complications resulting from diabetes

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirement of unity of inventions and relates to several inventions or groups of inventions, namely:

3. Claims 1,10,12-15,17,19,21,23,26,29 (partially) 9 (completely)

Use of a fibric acid derivative (gemfibrozil, fenofibrate, clofibrate, bezafibrate, ciprofibrate, clinofibrate) alone or in combination with an ACE inhibitor for manufacturing a medicament for preventing diabetes or preventing or reducing the risk of complications resulting from diabetes

- 4. Claims 1,10,12-15,17,19,21,23,26,29 (partially)
 Use of probucol alone or in combination with an ACE inhibitor for manufacturing a medicament for preventing diabetes or preventing or reducing the risk of complications resulting from diabetes
- 5. Claims 1,10,12-15,17,19,21,23,26,29 (partially)
 Use of dextrothyroxine and its sodium salt alone or in combination with an ACE inhibitor for manufacturing a medicament for preventing diabetes or preventing or reducing the risk of complications resulting from diabetes
- 6. Claims 1,10,12-15,17,19,21,23,26,29 (partially)
 Use of Bile acid sequestrants (cholestyramine, colestipol) alone or in combination with an ACE inhibitor for manufacturing a medicament for preventing diabetes or preventing or reducing the risk of complications resulting from diabetes
- 7. Claims 1,10,12-15,17,19,21,23,26,29 (partially)
 Use of nicotinic acid alone or in combination with an ACE inhibitor for manufacturing a medicament for preventing diabetes or preventing or reducing the risk of complications resulting from diabetes
- 8. Claims 1,10,12-15,17,19,21,23,26,29 (partially)
 Use of neomycin alone or in combination with an ACE inhibitor for manufacturing a medicament for preventing diabetes or preventing or reducing the risk of complications resulting from diabetes
- 9. Claims 1,10,12-15,17,19,21,23,26,29 (partially)
 Use of salicylic acid derivatives (p-amino-salicylic acid, acetylsalicylic acid) alone or in combination with an ACE inhibitor for manufacturing a

European Patent Office

EP 91 11 7658 -3-

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions, namely;

medicament for preventing diabetes or preventing or reducing the risk of complications resulting from diabetes

EP 91 11 7658

-C-

A compound cannot be defined by its activity (e.g. cholesterol lowering, HMG CoA reductase inhibiting, ACE-inhibiting etc.)

This characterization as well as descriptions of substances as analogs or derivatives of other compounds and the use of huge Markush formulas does not make clear which substances are meant.

The search therefor had to be restricted to the compounds which are explicitly mentioned in the claims and the -general inventive idea.

Please note that this restriction is also valid for possible further search for the subjects not searched now because of non-unity. (see sheet B). (Art. 84 EPC)
